

*Lois Perrine*

Type: Uterine Cancer, Colon Cancer

If anyone knows about cancer, it's Lois; she's been through both uterine and colon cancers! Lois is so thankful for early detection because that's how both cancers were discovered – with a routine physical and with a routine colonoscopy. “The American Cancer Society made such a difference as there was always someone to answer my many questions and reassure me that I was not alone,” says Lois. She also jokes that she talked with God so much, she imagined him saying, “Oh no, not Lois again!”
